The MYCO Medical Reli® Ben® is a sterile, disposable jamshidi-type bone marrow biopsy needle that features an exclusive “fish-mouth” cannula cutting edge that improves penetration and minimizes trauma.

- Hardened steel
- Sterile, single-use needles that reduce risk of infection
- The adjustable depth stop allows the evaluation of the depth of penetration
- Includes a syringe adapter for use with a luer slip or luer lock syringe
- Included specimen remover allows a rapid expulsion of the cylinder
- Unique “fish-mouth” cannula cutting edge provides a bioptic cylinder with intact architecture
- Stylet with trocar bevel allows a rapid, less invasive penetration
Every manufacturing detail of the Reli® Ben® has been carefully researched to provide the best results among biopsy instruments available to date.
